

Occupational Hygiene services for the Railway Industry

With decades of rail experience, we can help organisations to protect worker health and remain compliant with internal policies and external regulatory requirements.

Pragma

Occupational Hygiene Team

Rosie McKay

BSc MSci AFOH
Occupational Hygiene Lead

Rosie works to provide the specialist Occupational Hygiene advice businesses need to ensure they remain compliant with regulatory requirements, including guidance from RSSB. Rosie's experience includes risk control and monitoring for hazards including dust, welding fume, diesel, and noise.

Rosie manages the full range of Pragma's Occupational Hygiene services with input from our other construction industry experts. Individual CVs and project details are available from Rosie.

Steve Bradley

C Sci C Chem MRSC
Certified Occupational Hygienist

Steve has spent the majority of his career in the rail industry, undertaking projects relating to rail infrastructure, train operations and rolling stock maintenance. Steve's specialisms include hazardous substances, noise, vibration and respiratory hazards.

Steve uses 40 years of experience to offer practical advice for businesses to tackle their health and safety issues.

Bill Halkett

BSc LFOH
Certified Occupational Hygienist

Bill previously worked for British Rail Scientific Services in Scotland and Doncaster and has over 30 years of experience in the assessment and control of occupational health risks. Bill has carried out more than 500 workplace exposure surveys.

Bill uses his specialist expertise to ensure businesses maintain and exceed their occupational hygiene standards.

Ian Glendenning

BEng CEng CMIOSH MIMMM
Chartered Health & Safety Practitioner

Ian has over 30 years of industrial health and safety experience including time as an HM Inspector of Factories with responsibility for advice and enforcement of health and safety law. He has also acted as an expert witness in hundreds of occupational disease claims.

Ian is available to assist our clients in assuring compliance with legal standards.

Andrew Jenkins

BSc LFOH
Certified Occupational Hygienist

Andrew has been an Occupational Hygienist for over 32 years. Andrew's particular areas of speciality are asbestos, noise and vibration, thermal environment and volatile organic compounds.

Andrew's experience ensures that our advice and recommendations are practical and consistent with legal standards.

Tina Conroy

MChem Dip Occ Hyg CMFOH
Chartered Occupational Hygienist

Tina has experience implementing and auditing occupational hygiene projects on local, national and international platforms. She is also the lead for the British Occupational Hygiene Society's Breathe Freely in construction initiative.

Tina helps to deliver practical and focussed Occupational Hygiene advice to our clients.
