

Steel, Fabrication and Metal Work

As a team we have decades of Occupational Hygiene experience in the steel industry. This includes primary and secondary steel making, metal fabrication and metal finishing processes.

Pragma

Occupational Hygiene Team

Rosie McKay

BSc MSci AFOH

Occupational Hygiene Lead

Rosie's experience includes risk control and monitoring for isocyanates, welding fume, MWF, noise and anodising/passivation lines at metalworking facilities. Rosie also has experience of monitoring and regulation in relation to hexavalent chromium use in electroplating and painting.

Rosie manages the full range of Pragma's Occupational Hygiene services with input from our other steel and metal fabrication experts. Individual CVs and project details are available from Rosie.

Andrew Jenkins

BSc LFOH

Certified Occupational Hygienist

Tina Conroy

MChem Dip Occ Hyg CMFOH

Chartered Occupational Hygienist

Tina has in-depth experience of the steel industry and has worked across various Tata steel plants. Tina has implemented and audited steel industry occupational hygiene projects on local, national and international platforms.

Tina works in conjunction with our other steel and metal working industry experts to deliver practical and focussed occupational hygiene advice to our clients.

Ian Glendenning

BEng CEng CMIOSH MIMMM

Chartered Health & Safety Practitioner

Ian is a former HSE Inspector responsible for law enforcement at steel and metalworking plants. He has acted as an expert witness in hundreds of occupational disease claims including cases involving British Steel Corporation.

Ian is available to assist our clients in assuring compliance with legal standards.

Bill Halkett

BSc LFOH

Certified Occupational Hygienist

Bill has carried out noise, EMF, and vibration surveys in addition to atmospheric monitoring for hazardous substances for a variety of industries that includes foundries, engineering, and metal processing.

Bill's has extensive experience of assessing exposure to welding fumes, isocyanates, VOCs, and MWF.

Steve Bradley

C Sci C Chem MRSC

Certified Occupational Hygienist

Steve has vast experience of the assessment of exposure to dusts, vapours, gases, and fumes as well as noise, hand arm vibration and local exhaust ventilation inspection and testing.

Steve's specialisms include asbestos, noise, vibration, and respiratory hazards such as welding fumes and MWF.
