SUMMARY OF EXPERIENCE

I can provide advice and evidence based on over 40 years of experience. Having spent the majority of my career in the rail industry, I have developed various specialisms including asbestos, noise, vibration, respiratory diseases and occupational cancer.

My involvement in assessment and management of asbestos risks began in the 1970s. My experience with asbestos includes advising on control of asbestos dust from engineering processes, within the fabric of buildings and on contaminated land.

I am regularly instructed to provide expert advice in occupational disease cases and has accepted instructions in over 1000 personal injury cases.

I am active in my field and regularly provide consultancy services to employers, legal professionals, insurers and representative bodies.
