Pragma

Certified Occupational Hygienist

E: rosiemckay@pragmaandassociates.co.uk

T: 01302 499055

SUMMARY OF EXPERIENCE

I provide a comprehensive range of specialist occupational hygiene consultancy services for clients within both the public and private sectors. These services include specialist risk assessment, the monitoring of hazardous substances including chemicals, dust, fumes etc., assessing the suitability of control measures, and providing the specialist advice businesses need to ensure they remain compliant with both their internal policies and the relevant external regulatory requirements.

As a consultant, I have a range of industrial experience across a variety of sectors. I have advised a diverse list of businesses on how best to recognise, evaluate and control the particular environmental and occupational health hazards that are most prevalent within their sector.

EMPLOYMENT HISTORY

2020 - Present Pragma and Associates Ltd

Occupational Hygienist

Leading Pragma's independent occupational hygiene consultancy to ensure the provision of competent, practical and professional support to clients within the public and private sectors, including:

- Assessment and evaluation of hazards and risks to health in the workplace;
- Provision of monitoring to determine potential exposures to health hazards and to assess the suitability of control measures in place;
- Reviewing arrangements for the management of health hazards; and
- Ensuring ongoing compliance with both internal policies and external regulatory requirements.

2015 - 2020 Golder Associates

Environmental Consultant

- Environmental consultancy and on-site management of various occupational hygiene and ground remediation/contaminated land projects;
- Planning and implementation of occupational hygiene monitoring and assessments;
- Preparation of technical reports for a variety of aerospace and electronic manufacturing clients across the UK;
- Preparation of health and safety plans in relation to ground remediation and asbestos abatement work.
